

Lore of the Land: The Journal

The journal is your travel diary as you move through the CD-ROM.

The guide will help you to grasp the lay of the land before you begin your journey. You can linger at any of the points if you like what you see and hear there.

But it's your trip, so start your journey anywhere you want to begin. Follow the guide or mark out your own trail.

Do make some preparations before setting out. You might like to respond to the opening statement spoken by the narrator.

You could brainstorm what each of the themes in Lore of the Land means to you or write down some general statements that summarise your knowledge of these themes.

List down some of your hopes and expectations in undertaking this journey. What do you want to bring back with you when you return home?

Whatever you choose to do as your preparation will become your reference points along the way. Refer back to your notes as your progress through the CD-ROM. These will act as markers in helping you to achieve your aims.

Have a great trip!
